*Industrial Wireless Automation,
Integration and Management*

Field-Area Network Deployment Solutions

E2E Technologies is an expert in the deployment of nationwide multi-site, multi-service, multi-technology rollouts for industrial wireless automation, integration and management projects. Utilizing our proven processes and methodologies, we provide, manage and support a staff of field engineers and installation technicians to deploy wireless infrastructure technology, remote radio management and network monitoring software. This experienced team oversees job safety requirements as well as actual site preparation/construction and equipment installation.

Top Notch Field Engineers

We provide trained, experienced networking and radio management personnel to deploy, configure and test E2E Technologies' software solutions for managing the performance and reliability of your industrial wireless field-area networks.

Turn-Key Management of Your Projects

Our project management staff coordinates each part of the field deployment process. By combining the best program and project management practices with certified project managers, we provide you with a rollout solution that will reduce costs, deliver maximum value, and drive additional revenue and profits to your bottom line. Our quality control programs and weekly status reports ensure smooth delivery. Our project teams provide regular updates and post project status reports to your management tools or ours.

CUSTOMER BENEFITS

E2E Technologies' customers have benefited from our solutions in numerous ways including:

- Reduced communication downtime
- Mitigation of wireless security risks
- Project management continuity from start to finish
- End-to-end solutions delivered under one vendor contract

DEPLOYMENT SERVICES

Our industrial wireless engineering and procurement services include:

- Field Installation, Testing and Commissioning
- Project Management
- Wireless Site Preparation and Construction
- Network Management Software Deploy, Configuration and Test
- Jump-Start Training

E2E SOLUTIONS

Our solutions cover the industrial wireless communications market end-to-end including:

- Wireless Network Engineering
- Wireless Equipment, License and Structure Procurement
- Field-Area Network Deployment
- Field-Area Network Monitoring & Management
- Custom Software Development

PRODUCTS

We offer a wide range of leading edge Industrial Communication solutions:

- Industrial Wireless Radios
- Antennas and Accessories
- Network & Remote Equipment Management Software

For more information call our experienced staff at (651) 560-0321 or visit our website at www.e2etechinc.com for more details.

Wireless communication equipment deployed at an oil field pump-jack site.

Increase Staff Productivity with Jump-Start Training

As part of our field-area network deployment solutions E2E Technologies offers jump-start training for organizations who want to “hit the ground running” with their newly deployed industrial wireless communication systems. Our training will help your staff get a quick, productive start whether that is managing and maintaining your wireless infrastructure or monitoring your network and radios.

Go With an Experienced Staff For Your Next Project

E2E Technologies’ commitment to complete customer satisfaction means you get a committed workforce, managed by a professional, trained team. Contact us today for more information on how our Field-Area Network Deployment Solutions can solve your toughest industrial wireless communication challenges.
